

Highgate Lesson Study

- “Lesson Study is a professional learning process. It works because it focuses on the **learning** and **progress** made by children as their practitioners develop specific pedagogic techniques designed to improve an aspect of teaching and learning identified within their setting”.
- At Highgate we have been using the Lesson Study project with Community Partnership schools for the past 4 years.
- Colleagues have come together to look at a variety of subjects across different Key Stages.

What is Lesson Study?

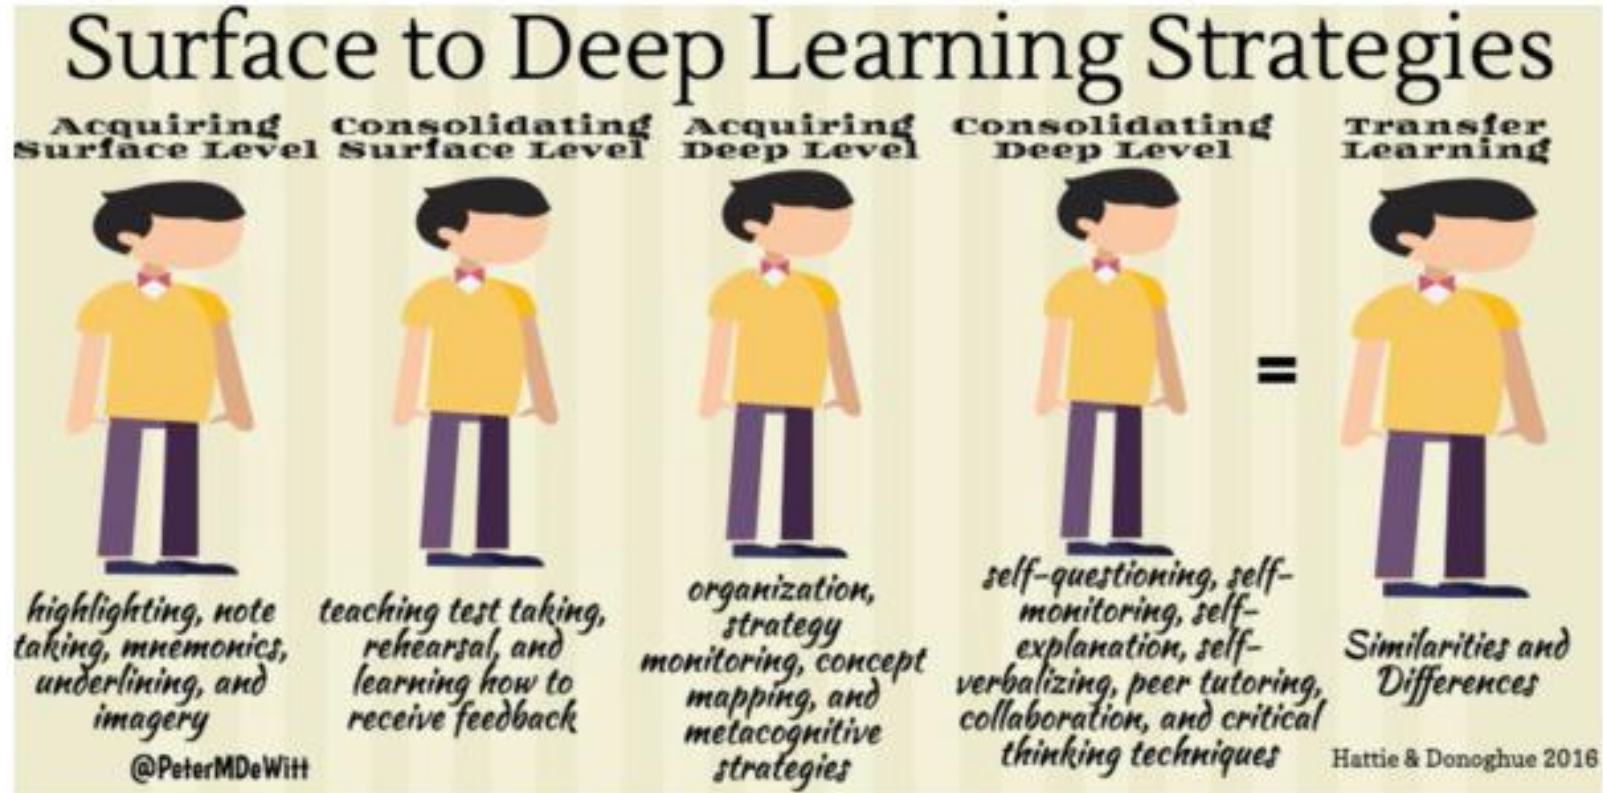

Pete Dudley introduced Lesson Study (LS) to the UK. He conducted his first Lesson Study in 2001 and later ran the national Lesson Study pilot from 2003-5. This was cross phase and funded by the ESRC Teaching and Learning Research Programme, the National College for School Leadership and CfBT.

Lessons Learnt!

Beauty of Lesson Study
